Library (Cantonese,  
Mandarin, English)

Custom Analysis Report

## Uses & Benefits

### Interactive Conversation

Help to assist first line support and providing interactive conversation with different languages.

- Limited the training time
- Available with different language
- Improve customer experience

### Interactive Navigation

Guiding towards locations, services and products that requested by customer.

- Pre-load the office / shop map with configuration
- Automated navigation feature will be provided without training time
- Off load front line resource
- Queue tickets printing / QR Code scanning

### Useful analysis reports

Collect and analysis customer response via all interactions between robot and the customer.

- All customer / guest facial attributes such as gender, age and emotion will be recorded
- Based on enterprise requirements, specific interact responses will be stored on premises or cloud
- Real time analysis report can be created based on client's requirements

### Branding and Promotion

All branding and promotion message can be broadcast to the robot instantly.

- Increase sales channel
- Push message based on client's promotion schedule
